

Innovation Ideas:

1. Collect more actual, more kind of data from users
2. Receive feedback from APP which can be used for adjusting deep learning model.

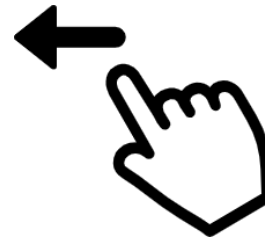

Get data from smart phones.
Acceleration, Gyroscope;
Bluetooth signal

Deep Learning model.
LSTM

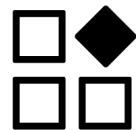

Predict bluetooth
distance to judge
close-connect

Predict hand-shake
class based on given
data

Combine into API for
Anti-Covid-19 APP

Feedback from APP
